

Shooting Training Simulator-110 (STS-110)

Shooting Training Simulator-110 (STS-110)

STS-110 is a unit/institution, indoor, multipurpose, multi-lane, small arms, crew-served, and individual anti-tank simulator that saves currently required ammunition resources, operation and personnel tempo, as well as travel time and costs to and from ranges. It simulates weapon training events that lead to live-fire individual or crew weapon qualification and training events currently not resourced under Standards in Training Commission (STRAC).

Squad leaders are able to control and evaluate individual, fire team, and squad performance. The STS-110 simulates any weapons such as: Klashinkof rifle, kolt, RPG, M16, ...

The STS-110 supports training from individual marksmanship skills through team/squad level tactical exercises with a variety of modified weapons. In addition, field artillery and mortar applications are available to further enhance collective and fire support training
