

Capabilities

- Engineering and simulation of different electro- optical systems.
- Optimization, reconstruction and modernization of electro-optical systems
- Designing and manufacturing different types of aircraft windshields
- Designing and manufacturing of optical parts (lenses, prisms, mirrors, reticules)
- Designing and manufacturing different multi layer optical coatings and optical filters
- Designing and manufacturing special safety glasses (anti-bullet, explosion, rubbery and incursion)
- Designing and installation of border guard surveillance systems
- Capable of supplying workshop centers
- Consulting services on all above mentioned items
