

## Shooting Training Simulator-I IO (STS-110)

Shooting Training Simulator-I IO  
(STS-110)

### Shooting Training Simulator-110 (STS-110)

STS-110 is developed to train stand alone snipers and team training.

System provides training using 3D tactical mission scenarios and fixed targets (polygon). Instructor is provided with a scenario generation tool to generate specific mission scenarios as required.

Training system has integrated laser instrumented weapons to simulate shooting and 3D Visualization system to display scenarios.
